**Being innovative, changing with right knowledge
Be a light to the country as well as to the world**

Message from the Hon. Minister of Education

The past two decades have been significant in the world history due to changes that took place in technology. The present students face a lot of new challenges along with the rapid development of Information Technology, communication and other related fields. The manner of career opportunities are liable to change specifically in the near future. In such an environment, with a new technological and intellectual society, thousands of innovative career opportunities would be created. To win those challenges, it is the responsibility of the Sri Lankan Government and myself, as the Minister of Education, to empower you all.

This book is a product of free education. Your aim must be to use this book properly and acquire the necessary knowledge out of it. The government in turn is able to provide free textbooks to you, as a result of the commitment and labour of your parents and elders.

Since we have understood that the education is crucial in deciding the future of a country, the government has taken steps to change curriculum to suit the rapid changes of the technological world. Hence, you have to dedicate yourselves to become productive citizens. I believe that the knowledge this book provides will suffice your aim.

It is your duty to give a proper value to the money spent by the government on your education. Also you should understand that education determines your future. Make sure that you reach the optimum social stratum through education.

I congratulate you to enjoy that benefits of free education and bloom as an honoured citizen who takes the name of Sri Lanka to the world.

A handwritten signature in black ink, which appears to read 'Akila Viraj Kariyawasam'. The signature is written in a cursive style with a horizontal line underneath.

Minister of Education

Foreword

You have been born in a country, which has been eulogized as the “Pearl of the Indian Ocean”. Though your motherland is small in size, its value is immeasurable. You, who have been born in such a precious country, are really fortunate. Our sole intention is to see you as a successful citizen who has learnt well, adorned with good qualities, who is wise and powerful making your country an ideal place. The government provides you all the facilities for education in order to achieve that expectation. As one of the measures taken by the government towards that, this book is gifted to you.

By now, new textbooks compiled in accordance with the new primary curricula have been introduced to grades one, two and three. This time, a set of new textbooks has been introduced to grade four. After introducing new textbooks for grade five in 2020, the revision of the primary curricula will be completed.

I would like to express my heartiest thanks to the members of both panels of writers and editors and to the staff of the Educational Publications Department for involving in making this book available to you.
