(10 marks)

Penguins

Penguins are flightless seabirds. They are the only birds that can swim but cannot fly. These black and white seabirds move about very easily in the water. On land they stand upright and waddle about.

There are eighteen species, or types of penguins. They are found mainly in Southern half of the world. Many types are found in the cold regions of Antarctica or nearby islands. Penguins also live along the cool coasts of Africa, New Zealand , Australia and South America.

Penguins typically has a black back and a white belly. The largest type is the Emperor penguin. Penguins are excellent swimmers and divers. They can swim faster than 25 miles per hour. Penguins use their short paddle like wings as flippers for swimming. They eat small fishes, squid and krill.

1. Who are penguins?

2. What colour are they?

3. How many types of penguins are there?

4. In which countries do they live?

5. What is the largest type of penguin?
